

Compact and fast forklift trucks with retractable mast, ideal for drive in warehouses

Neos II 13-16 K ac is the compact version of the OMG retractable truck and its width is 12 cm smaller than the standard version, thus allowing it to deliver maximum performance even in small spaces. Each component is duly tested and subjected to the most rigorous trials so that we can obtain a competitive and satisfactory product. The motors, the electronic controls and the masts meet the strictest quality standards, bringing actual added value to this type of products.

Frame

The monobloc construction of the frame ensures maximum stability and enhanced mechanical resistance during stacking and travelling, maintaining high residual capacities even at maximum height. The battery compartment can be easily opened, simplifying the daily and periodical battery recharge and check operations. Standard lateral battery extraction system with rollers for readily battery replacement in case of intensive use during multiple work shifts.

Drive

Powerful and reliable three-phase ac traction motors, able to satisfy even the most demanding requests for performance, providing the necessary amount of power every time, as the speed of the truck can be adjusted by

changing the position of the accelerator pedal.

Steering

Easy to use servo-assisted electric steering with electronic equipment and dedicated ac motor for safe, silent and simple operation. The steering wheel can be longitudinally adjusted for enhanced driving comfort, with the possibility of selecting between 180° or 360° guidance by simply pressing the selection button.

Hydraulic functions

Powerful and silent ac lift motor, capable of adjusting the number of revolutions of the pump, providing the appropriate amount of oil every time. All hydraulic functions can be controlled using finger tips for precise and safe

load handling. Mast with built-in braking system for gradual slowdown at the end of the stroke, preventing any sudden stops that might affect the stability of the load.

Masts

The masts made of cold extruded profiles highly resistant to twisting and bending are available in the following versions:

- triplex masts with high overall free lift and lift capacities from 4,160 to 10,460 mm and above (on request);
- Tilting Forks;
- forks with built-in lateral shift adjustment to prevent changing the centre of gravity and for maintaining optimal residual capacities at any height.

Braking system

Independent braking systems available on all the products in this range:

- regenerative braking by reversing the running direction;
- regenerative braking by releasing the accelerator pedal; a real advantage for this type of product
- electromagnetic parking brake on the drive wheel;
- hydraulic braking on load wheels.

Electronic system

All the products in the Neos II range are fitted with cutting edge electronic controls that check and enable all machine functions and allow unlimited adjustments for performance optimisation, adapting the truck to the operation to be carried out. All hydraulic functions, electric drive and braking parameters can be set electronically from dashboard or remote desktop (directly by OMG), according to customer's requirements.

Operator's compartment

- fabric seat adjustable in depth and height;
- depth adjustable steering wheel;
- non-slip footrest;
- LCD display showing the most important operating data:
 - parking brake indicator;
 - warning lights (neutral position, controller and motor overheating);
 - operating hours timer;
 - travel speed display;
 - speed limiter "ON" indicator (tortoise button);
 - various operating modes E/S/H, E=economy S=standard H=super;
 - battery level indicator.

Finger tip

All hydraulic functions can be controlled using proportional finger tips for precise and safe load handling.

Lateral battery extraction

Lateral battery extraction system with rollers for readily battery replacement in case of intensive use during multiple work shifts.

Characteristics	1.1	Manufacturer			OMG S.r.l. Single member company	
	1.2	Model			NEOS II 13K ac	Neos II 16K ac
